How to Make Cat Puppets
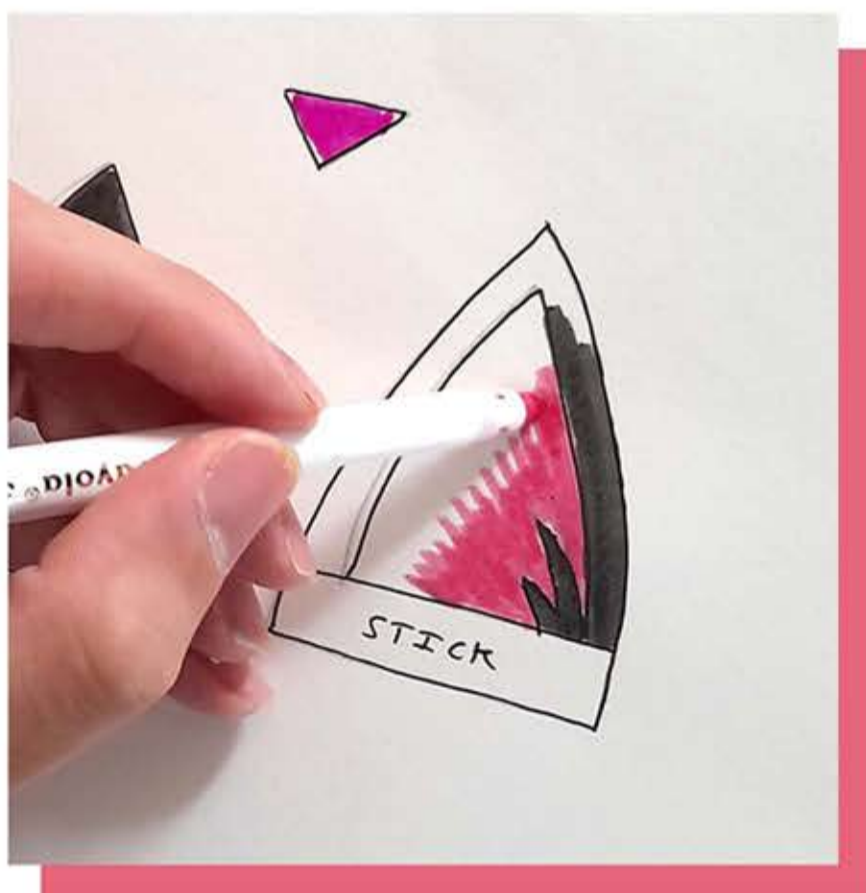

Step 1

1) Draw two identical triangles onto a piese of card or paper.

2) Add a tiny rectangular flap to the bottom of the triangle for sticking.

3) Now you can add colour and other details to the cat's ears.

4) Carefully cut out the ears ensuring you don't chop off the sticking flap.

Step 2

1) Draw a tiny triangle for the nose and add some colour with a pencil or felt-tip

2) Cut out the triangle and put it somewhere safe.

Step 3

1) Use a black pen carefully colour two black dots onto your two polystyrene eyeballs.

Step 4

1) Cut out some thin strips of paper.

2) Use a felt tip and colour both sides of the paper strips.

Step 5

Place your sock over your hand popping your thumb into the heel and your fingers into the part where your toes would go.

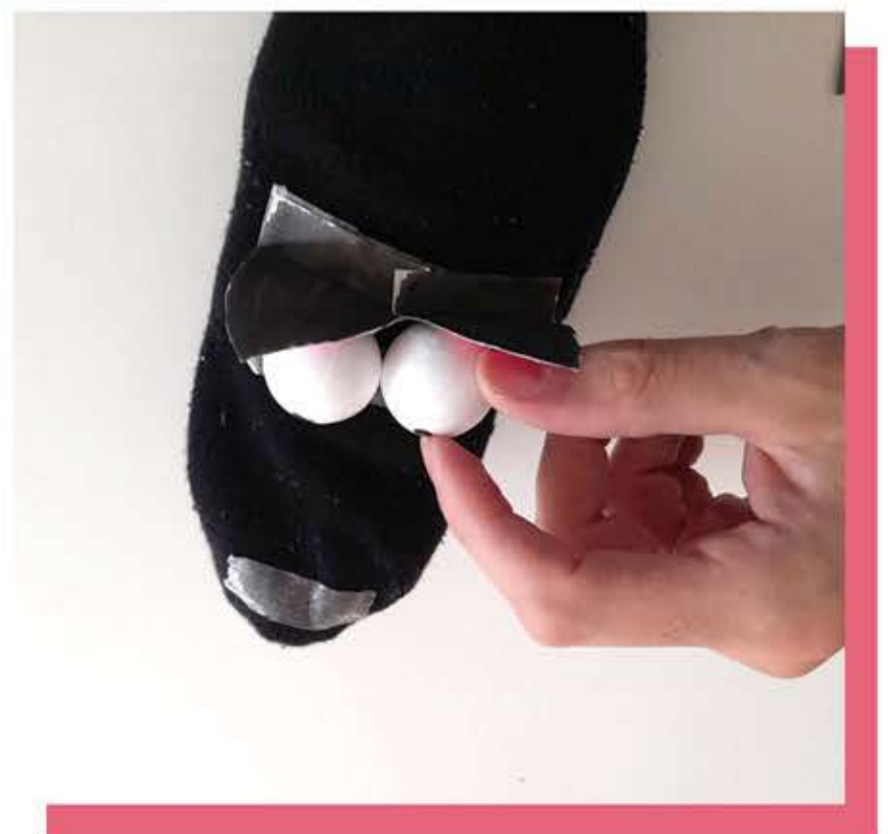

Step 6

1) With the sock on your hand attach two strips of double sided tape below your knuckles leaving a small gap in-between.

2) Attach another smaller piece near the end of your finger tips.

3) Once all three parts are secure, carefully peel the plastic back to reveal the sticky bit.

Step 7

Take the two cat ears you prepared earlier and stick the rectangular flap to the double sided tape closest to your knuckle.

Step 8

After this you can attach the eyes by placing them onto the next piece of tape ensuring they are facing forwards.

Step 9

The last thing to do is attach the whiskers. Carefully stick three whiskers on each side of the smallest piece of tape near your fingers.

Ensure you leave a gap in-between the two sets of whiskers in order to attach the nose.

Have Fun!
